PROJECTS

WorldGuru | *Java, HTML/CSS, SQL*   May 2023; Status: Completed

Team project. The app is a set of mini-games on geographical topics: defining the flag of the country, knowing the fact about it, knowing the country's territory and characteristics. The app provides the ability to register a user, authenticate them subsequently, and save progress in minigames, as well as games without registering without retaining progress.

TheWayBy | *Python, TelegramBotAPI*   November 2023 - January 2024; Status: Completed

Chat-bot of tourist routes of Belarus! We will gladly show you all the most beautiful corners of our unique country. Immerse yourself in a real journey and discover Belarus!

ExplorandumTerram | *Java, Spring, HTML/CSS, SQL*   April 2024 - Till now; Status: Abandoned

Small web application that allows you to improve your knowledge of geography and history using mini-games and prepared notes.
